Semi-Automatic CMC-7 and Bar Code Reader

Since 1985, **Nonus** has been developing and manufacturing CMC-7 document and bar code readers, terminals for check verification and bar code sensors. With a 100% Brazilian technology, it exports to countries in Europe, Africa and Latin America. **Nonus's** success can be measured mainly from the satisfaction of its clients, users of more than one million pieces of equipment already manufactured. Be a **Nonus's** client and confirm our technology.

Handbank office is a check and/or bar code semi-automatic reader which works with a motor-driven system. Perfect to small and medium business, **Handbank office** is indicated to speed receiving and check management in gyms, supermarkets, stores, schools, banks and restaurants. By using bar code reading, you can automate any process based on bar code printed in plain documents.
