

# Slot Reader Kit

To CMC-7 and  
Bar code reading

**Plug  
& Read!**

Since 1985, **Nonus** has been developing and manufacturing CMC-7 document and bar code readers, terminals for check verification and bar code sensors. With a 100% Brazilian technology, it exports to countries in Europe, Africa and Latin America. **Nonus's** success can be measured mainly from the satisfaction of its clients, users of more than one million pieces of equipment already manufactured. Be a **Nonus's** client and confirm our technology.

**Slot N-10 Kit** - CMC-7 and bar code reading

**Slot N-20 Kit** - CMC-7 reading

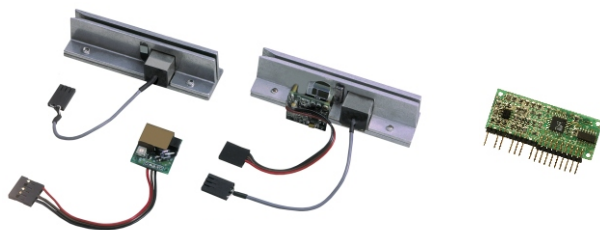

**Slot N-30 Kit** - Bar Code reading

**Technology  
that changes  
hours into minutes**

# Slot Reader Kit

To CMC-7 and Bar code reading

## CMC-7 and/or Bar Code Slot

<b>Document Swiping Speed</b>	30 to 150 cm/s
<b>Durability</b>	Greater than 1,000,000 readings
<b>Reading</b>	CMC-7 and/or Bar Codes plain paper documents or cards
<b>Size</b>	93mm(W) X 30mm(D) X 40(H)

Measures in the maximum configuration with decoded reading of CMC-7 and Bar Codes. Holdings compatible with the magnetic card readers available in the marketplace

## Nonus Bar Code Sensor

<b>Voltage</b>	5 VDC
<b>Consumption</b>	25 mA
<b>Output</b>	TTL/open collector
<b>Reading speed</b>	20 to 200 cm/s
<b>Focal Distance</b>	8mm +/- 1.5mm from the document to the center of the fixation holes
<b>Size</b>	24mm (W) X 23.5mm (D) X 10mm (H)

## Decoding Board

<b>Power supply</b>	5V / 20mA
<b>Size</b>	29mm(W) X 53.5mm(L)
<b>Micro-controller</b>	High-performance RISC (Firmware developed in C++). Download OnBoard
<b>Configuration</b>	Through bar code or CMC-7 programming cards
<b>Decoding</b>	CMC-7 and Bar Code (Interleaved 2 of 5 and Code 39)
<b>Interfaces</b>	TTL level, RS-232-C and keyboard wedge PC
<b>Indicators</b>	Extensor for LEDs and beep indicating right reading and misreading
